

## **Holly Swanson Speaks to JCRW by Editor Ruth Brodman**

Holly Swanson—Author of *Set Up & Sold Out* and Founder Activist of the Green Out Movement spoke to the JCRW on Thursday April 9<sup>th</sup> 2009 at the Monthly Luncheon meeting.

She motivated the entire group and many of our members signed up to help in this very important movement against the Green Machine—really the Communist Party in hiding under the guise of Global Warming; among one of many organizations that have flocked to this cause in hope of changing America into a Socialized State. This is a cause to fight against because it attacks the heart and soul of our country. Our Children.

This subversive movement has already hijacked public education to politically indoctrinate or brainwash our Children. They have been doing it for the past 40 years. They have politicized the curriculum to dictate how our children will think, live and vote. The one party system in our schools has become the norm. This program is designed to change our children's religious, social, economic and political beliefs.

Two generations have already been turned. However there is hope and it must start at the grass roots level. By us. If we can ban together as a nation on April 15<sup>th</sup> in over 2000 cities with hundreds of thousands joining in the fight against the unfair bailouts and the out of control spending we can do this here on a local level.

Holly made us aware of a Federal Law called the "Protection of Pupil Rights 20 U.S. Code 1232h" subheading "Inspection by parents or guardians of instructional material. In a nutshell—"All instructional material, including teacher's manuals, films, tapes, or other supplementary instructional material which will be used in connection with any research or experimentation program or project shall be available for inspection by the parents or guardians of the children engaged in such program or project. For the purpose of this section "research or experimentation program or project means any program or project in any applicable program designed to explore or develop new or unproven teaching methods or techniques."

The law also prevents a student from being asked to divulge his political affiliation, mental & psychological problems, sex behavior, illegal, anti social self-incriminating & Demeaning behavior, critical appraisals of other individuals with whom students have close family relationships, income without the prior consent of the student if an adult or without prior written consent of the parent.

We have a plan to get the local school curriculum. This would be a first step in looking into what our students are learning. We can then formulate a plan. We need serious volunteers to assist in this effort. If you wish to help write to holly at [\*\*greenout@earthlink.net\*\*](mailto:greenout@earthlink.net).

We highly recommend that all read her book. The information is excellent, well done and an eye opener. For myself I am on my third reading. A fountain of good information. Please write to Holly if you wish to receive a copy.
