### How Big Government Took Over Our Economy

The federal government now controls 30% of the U.S. economy, thanks to billion-dollar bailouts of insurance companies, banks, Wall Street firms, and the auto industry.

How did the freest economy in the world come to this?

In his shocking exposé, *Obamanomics*, investigative reporter Tim Carney reveals how Big Government partnered with Big Business and Big Labor to cover up failure—and squash small business.

From conspiring with the healthcare industry to cutting sweetheart deals with corporate cronies and union boss buddies, the Obama administration is working hand-in-hand with Big Business to line Wall Street's pockets, gain more power, and crush tax payers.

Featuring a foreword by Ron Paul, *Obamanomics* reveals:

- How despite Obama's campaign promises of hope and change in Washington, his record shows he constantly favors lobbyists and special interests over entrepreneurs and taxpayers
- The Great Health Care Scam—Obama's backroom deals with drug companies spell profits and more government control
- The Global Warming Hoax—Obama has bought off industries with a pork-filled bill that will drain your wallet for Al Gore's agenda
- How the GOP needs to drastically change its tune to battle Obamanomics

Think Big Government and Big Business are rivals with opposite interests? After reading *Obamanomics*, you'll know that's just a Big Myth. And you will understand the threat posed by Obamanomics to all entrepreneurs, small businessmen, and American tax payers.

**Timothy P. Carney** is the lobbying editor and a columnist at the Washington Examiner. His first book, *The Big Ripoff: How Big Business and Big Government Steal Your Money*, won the Templeton Enterprise Award from the Intercollegiate Studies Institute and the 2006 Lysander Spooner Award for the "best book on liberty." A protégé of veteran columnist Robert Novak, Tim was senior reporter and later editor at the Evans-Novak Political Report. His work has appeared in the *Wall Street Journal*, *New York Post*, *American Spectator*, *American Conservative*, *Huffington Post*, *National Review Online*, *Human Events*, and many other publications.
